

80W90 P

220L

Axle and transmission oil

Semi-synthetic

Semi synthetic oil for all types of truck and civil engineering axles and transmissions operating in severe conditions.

PERFORMANCE

**API GL4/GL5 | API MT-1 | MIL-PRF-2105 E | SAE J2360
ZF TE-ML 02B
MAN 3343 Type M, 341 Type E2/Z2, 342 Type M2**

Good viscosity index

Efficient lubrication of the bearings ensured at low temperature
Protection against wear at high temperature.

Antifoaming properties

Oil consumption and cavitation problems in pumps reduced.

Extreme pressure additives

Formation of a resistant «lubricating film».

Excellent oxidation stability

Extended oil drains intervals (60 000 to 160 000 kms according to the equipment and its use).

Technical data

Viscosity at 40°C (cSt) : 150
Viscosity at 100°C (cSt) : 15.4
Viscosity index : 105
Density : 0.897

The given data are typical data.
