

COUPE LS 120

30L

Metal working oil

Semi-synthetic

Soluble cutting designed for **metal working** : turning, milling, drilling, sawing, cutting, boring, threading, screw cutting. It is formulated with **corrosion inhibitors and efficient bactericides**.

This product is used diluted by 4 to 6% in water according to work conditions.

ISO - L - MAH

Resistant to bacterial attacks

Antiwear and anticorrosion properties

High cooling power

No gumming of the sliding channels

Easily miscible with water, quick formation (without heating) of a clear and very stable micro-emulsion

Technical data

Biostable product | Colour : clear, amber

Density at 20°C : 0.99

PH-value 30 vol. % : 9.5

Corrosion test Herbert (IP 125) : 0/0-0

Foaming test IP 312 : initial / 5 mn (mm) : 30/0

Take precautions when used with non ferrous metals, particularly with copper and aluminium.

Maximum temperature for storage : > 0°C

The given data are typical data.
