

MULTI COUPE K1

30L

Metal working oil

Mineral

MULTI COUPE K1 is a pure **cutting oil**, not mixable with water. It is developed for severe **metal working with steel and steel alloyings**. It does not stain the metal and has extreme pressure properties.

It is particularly suitable for the following metal workings : cutting with knife, shaving, grinding, screw cutting in steel ; screwing, deep drilling, boring, cutting of gears, drawing, mortising, broaching ; sawing, turning, boring with twist drill.

ISO - L - MHE

Performance additives

Surface states of the tooled pieces improved
Tools wear decreased, by reducing the sticking between the tool and the chips.

Technical data

Colour : brown
Density at 20°C : 0.916
Kinematic viscosity at 40°C (cSt) : 46

The given data are typical data.
