

### ACCOFLUID T68

30L | 60L | 220L

Hydraulic oil

Mineral

**Multigrade** mineral oil containing antioxidant, anti-wear and anti-foam additives for all **hydraulic circuits**.

These high-quality hydraulic oils are used in industrial hydraulic circuits (presses, robotics) and mobile equipment (construction equipment, transport equipment, agriculture, etc.) equipped with pumps or pallet motors and with pistons.

#### PERFORMANCE

**AFNOR NFE 48603 : HV | DIN 51524-2 : HLP  
DIN 51524-3 : HVLP | ISO 3498 : VG 68 | DENISON : HF0**

#### **Good viscosity index, good demulsibility and antifoaming quality**

Good energy transmission.

#### **Antiwear, anticorrosion, antioxidant and extreme pressure additives**

Protection of the circuit elements.

#### **Excellent shear strength**

Stability in service.

#### **Compatible with silver-plated or bronze elements**

#### **Technical data**

Viscosity at 40°C (cSt) : 68  
Viscosity at 100°C (cSt) : 10.9  
Viscosity Index : 147  
Pour point (°C) : -37  
Flash point (°C) : 220  
Density : 0.880

The given data are typical data.
