

ACCOGRAISSE HT 200

Grease

Grease with **nonsoap thickener** developed for **industrial applications under high-temperature conditions**.

Type of use : ventilator bearings, oven doors, oven conveyors, mixing mill, dryers ; thermometrical wells ; plain and antifriction bearings, ball and roller bearings, under heavy load at low speed and high temperature ; running wheel and caterpillar of building site equipment working in water

NLGI 2

High thermic stability

Good lubrication up to 300°C.

Anticorrosion additive

Protection of all mechanical elements.

Excellent resistance to water, hot or cold weather

Technical data

Nature of soap : nonsoap

Colour : light amber | Appearance : smooth

Penetration [NF T 60-132] (1/10 mm) : 270/300

4 weld balls [ASTM D 2596] (Kg) : 200

Limit temperature of use (°C) : -15 to +300

The given data are typical data.
