

ACCOGRAISSE HT 600

1 Kg

Grease

HT 600 is an **aluminum** grease that prevents seizure and corrosion. It provides a permanent protection against rust and oxidation, even at **high temperatures**.

The assembly and disassembly of certain metal parts are considerably facilitated.

Excellent resistance to oxidation

Good resistance at high temperature

Prevents seizure and extraction

Allows the creep of the metal

Has a very low coefficient of friction

Technical data

Color : silver
Appearance : pasty
Penetration [NF T 60-132] : 310/340
Temperature of use (°C) : -40 to 650°C
Density : 1.05
Dielectric conductivity :
 $2,25 \cdot 10^8 \cdot \Omega^{-1} \cdot m^{-1}$

The given data are typical data
