

ACCOGEL N 325

20L | 60L | 210L

Antifreeze

This amber-coloured antifreeze is formulated with **high quality monoethylene glycol base, corrosion and emulsion inhibitors.**

It has been developed for the «new generation» engines and more especially to meet the following car manufacturers requirements: **MERCEDES - BMW – MTU.**

ASTM D 3306 | SAE J1034 | MERCEDES 325.2
BS 6580 | ONORM V 5123 | AFNOR NF R 15-601

Efficient and long lasting protection of the engine and the cooling system components, including those in aluminium

Anticorrosion and antifoaming additives

Exempt from potentially harmful additives such as nitrites, amines and phosphates

To ensure good cooling it is recommended to use from 25% to 50% volume of ACCOGEL N 325 in the coolant solution

Technical data

Density at 20°C : 1.127

Boiling point (°C) : 176

Reserve alkalinity : > 20

Pure antifreeze pH: 8.1

Diluted antifreeze pH 33% : 8 - 8.5

Foaming (ml) : < 50

Break time (s) : 3

M.E.G. (%) : 95

The given data are typical data.
