

ACCORAL PERMANENT -35°C

60L | 210L

Coolant

This blue-coloured coolant is formulated with **high quality monoethylene glycol, distilled water and corrosion inhibitors.**

It has been developed in accordance with the latest car and truck manufacturers requirements.

NF R 15-601 – Type 3

High boiling point

Good cooling of the engine ensured.

Anticorrosion additive

Full protection of the radiators components, including those made in aluminium.

Protection against freezing down to -35°C

Pre-diluted and ready to be used

Technical data

Density : 1.075

M.E.G. + inhibitors (%) : 48

pH : 8.1

Reserve alkalinity : 11.5

Boiling point : 108

Foaming volume (ml) : ≤ 50

Break time (s) : ≤ 3

Weight loss : 0.4 mg/cm on steel-iron cast-copper-brass-welds-aluminium

The given data are typical data.
